Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 71 • No. 1 • January 2000

INVITED REVIEWS

1 Phytochromes, cryptochromes, phototropin: photoreceptor interactions in plants

Jorge J. Casal

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

12 Mechanistic and kinetic aspects of photosensitization in the presence of oxygen

Charles Tanielian, Robert Mechin, Rachid Seghrouchni, Claude Schweitzer

20 Photobiological properties of positively charged methylene violet analogs

Melissa A. Houghtaling, Rushika Perera, Katherine E. Owen, Stephen Wagner, Richard J. Kuhn, Harry Morrison

29 The photochemical behavior of colchicone and thiocolchicone

Laura Bussotti, Maurizio D'Auria, Paolo Foggi, Giordano Lesma, Roberto Righini, Alessandra Silvani

35 Use of styrene radical cations as probes for the complexation dynamics of charged guests with α- and β-cyclodextrins

R. S. Murphy, C. Bohne

44 Studies on the radiolytically produced transients of neutral red: triplet and reduced radicals

M. K. Singh, H. Pal, A.V. Sapre

53 Photophysical properties of neutral and cationic tetrapyridinoporphyrazines

Cristina Marti, Santi Nonell, Mónica Nicolau, Tomás Torres

60 Correlations between reported and measured ultraviolet radiation exposure of mothers and young children

David L. O'Riordan, Warren R. Stanton, Margo Eyeson-Annan, Peter Gies, Colin Roy

65 Ultraviolet B Irradiation modulates the immune system of fish (*Rutilus rutilus*, Cyprinidae) II: Blood

Harri M. Salo, E. Ilmari Jokinen, S. Eveliina Markkula, Tuula M. Aaltonen

PHOTOSYNTHESIS AND PHOTOCONVERSION

71 Chlorophyll *a* self-assembly in polar solvent–water mixtures

Radka Vladkova

84 Isolation and initial characterization of 13^2-hydroxychlorophyll *a* induced by cyclohexanedione derivatives in tobacco cell suspension cultures

Jing-Ming Wang, Tadao Asami, Noboru Murofushi, Shigeo Yoshida

PHOTOMEDICINE

90 Virus photoinactivation in stroma-free hemoglobin with methylene blue or 1,9-dimethylmethylene blue

Junichi Hirayama, Stephen J. Wagner, Charlotte Gomez, Victor W. Macdonald, Hideki Abe, Hisami Ikeda, Kenji Ikebuchi, Sadayoshi Sekiguchi

94 Sites of photodamage induced by photodynamic therapy with a chlorin e6 triacetoxymethyl ester (CAME)

David Kessel, R.D. Poretz

97 Subcellular alterations induced by UV-oxidized low-density lipoproteins in epithelial cells can be counteracted by α-tocopherol

Roberta Masella, Elisabetta Straface, Claudio Giovannini, Roberta Di Benedetto, Beatrice Scazzocchio, Marina Viora, Alfredo Cantafora, Walter Malorni

PHOTOSENSORY BIOLOGY

103 Cytochrome b_6/f complex as an indigenous photodynamic generator of singlet oxygen in thylakoid membranes

Hwa-Jin Suh, Chang Sook Kim, Jin Jung

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 71 • No. 2 • February 2000

SYMPOSIUM-IN-PRINT

111 Synergistic insecticidal mode of action between sesquiterpene lactones and a phototoxin, α-terthienyl

Gabriel Guillet, Juraj Harmatha, Thomas G. Waddell, Bernard J. R. Philogène, John T. Arnason

116 UVB/UVA radiation activates a 48 kDa myelin basic protein kinase and potentiates wound signaling in tomato leaves

Johannes W. Stratmann, Boguslawa A. Stelmach, Elmar W. Weiler, Clarence A. Ryan

124 Porphyrins and related compounds as photoactivatable insecticides. 3. Laboratory and field studies

T. Ben Amor, L. Bortolotto, G. Jori

129 Vitamin B_6 (pyridoxine) and its derivatives are efficient singlet oxygen quenchers and potential fungal antioxidants

P. Bilski, M. Y. Li, M. Ehrenshaft, M. E. Daub, C. F. Chignell

135 Dihydrocercosporin singlet oxygen production and subcellular localization: A possible defense against cercosporin phototoxicity in *Cercospora*

Margaret E. Daub, Ming Li, Piotr Bilski, Colin F. Chignell

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

141 Photoyellowing inhibition of bleached high yield pulps using novel water-soluble UV screens

Dimitris S. Argyropoulos, Patrick Halevy, Philip Peng

149 On the interaction of UV screens with the lignocellulosic matrix

Philip P. Peng, Dimitris S. Argyropoulos

157 End-to-end diffusion on the microsecond timescale measured with resonance energy transfer from a long-lifetime rhenium metal–ligand complex

Joseph R. Lakowicz, Rajesh Nair, Grzegorz Piszczek, Ignacy Gryczynski

162 Effects of cytosine methylation on pyrimidine dimer formation in DNA

David L. Mitchell

166 Multidimensional reaction coordinate for the excited-state H-atom transfer in perylene quinones: Importance of the 7-membered ring in hypocrellins A and B

Anindya Datta, Alexandre V. Smirnov, Jin Wen, George Chumanov, Jacob W. Petrich

173 A photophysical and photochemical study on 6-methoxy-2-naphthylacetic acid, the major metabolite of the phototoxic NSAID nabumetone

F. Boscá, N. Canudas, M. L. Marín, M. A. Miranda

PHOTOMEDICINE

178 Time-resolved fluorescence spectra of arterial fluorescent compounds: Reconstruction with the Laguerre expansion technique

Jean-Michel I. Maarek, Laura Marcu, Wendy J. Snyder, Warren S. Grundfest

188 Strategies for evaluation of enveloped virus inactivation in red cell concentrates using hypericin

Alfred M. Prince, Donna Pascual, Daniel Meruelo, Leonard Liebes, Yehuda Mazur, Edward Dubovi, Mathilda Mandel, Gad Lavie

196 Determinants of the apoptotic response to lysosomal photodamage

David Kessel, Yu Luo, Patricia Mathieu, John J. Reiners, Jr.

201 The role of the p53 tumor suppressor in the response of human cells to Photofrin-mediated photodynamic therapy

Zhimin Tong, Gurmit Singh, Andrew J. Rainbow

211 Biodistribution and bioactivity of tetra-pegylated meta-tetra(hydroxyphenyl)chlorin compared to native meta-tetra(hydroxyphenyl)chlorin in a rat liver tumor model

Jeroen P. Rovers, Anne E. Saarnak, Martin de Jode, Hendricus J. C. M. Sterenborg, Onno T. Terpstra, Michael F. Grahn

218 Proteoglycan synthesis in porcine nasal cartilage grafts following Nd:YAG (λ=1.32 μm) laser-mediated reshaping

Brian J. F. Wong, Thomas E. Milner, Hong K. Kim, Ken Chao, Chung-Ho Sun, Emil N. Sobol, J. Stuart Nelson

PHOTOSENSORY BIOLOGY

225 Transmission spectra of light to the mammalian retina

James Dillon, Lei Zheng, John C. Merriam, Elizabeth R. Gaillard

230 Properties of the bimodal fluorescent protein produced by *Photobacterium phosphoreum*

Hajime Karatani, Taku Konaka, Chihiro Katsukawa

237 Activities of the bimodal fluorescent protein produced by *Photobacterium phosphoreum* strain bmFP in the luciferase reaction *in vitro*

Hajime Karatani, Taku Konaka

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 71 • No. 3 • March 2000

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

243 Ring opening photoreactions of cytosine and uracil with ethylamine

Kellie Hom, Gary Strahan, Martin D. Shetlar

254 DNA damage induced by 4,6,8,9-tetramethyl-2H-furo[2,3-h]quinolin-2-one, a new furocoumarin analog: Photochemical mechanisms

F. Bordin, F. Baccichetti, C. Marzano, F. Carlassare, G. Miolo, A. Chilin, A. Guiotto

263 DNA damage induced by 4,6,8,9-tetramethyl-2H-furo[2,3-h]quinolin-2-one, a new furocoumarin analog: Biological consequences

C. Marzano, F. Baccichetti, F. Carlassare, A. Chilin, S. Lora, F. Bordin

273 Polyethylene glycol matrix reduces the rates of photochemical and thermal release of nitric oxide from *s*-nitroso-*n*-acetylcysteine

Sílvia Mika Shishido, Marcelo Ganzarolli de Oliveira

281 Spectroscopic properties of fluoroquinolone antibiotics and nanosecond solvation dynamics in aerosol-OT (AOT) reverse micelles

Hyoung-Ryun Park, Hyeong-Chul Lee, Tae Heung Kim, Jin-Ki Lee, Kiyull Yang, Ki-Min Bark

294 On the photochromism of spiro[cyclohexadiene-dihydroacridines]

T. Häupl, T. Zimmermann, R. Hermann, O. Brede

300 Interaction of the excited singlet state of neutral red with aromatic amines

M.K. Singh, H. Pal, A.V. Sapre

307 Hydroxyterephthalate as a fluorescent probe for hydroxyl radicals: Application to hair melanin

Xinhua Qu, Louis J. Kirschenbaum, Edward T. Borish

314 Evaluation of the protective effect of sunscreens on *in vitro* reconstructed human skin exposed to UVB or UVA irradiation

Françoise Bernerd, Corinne Vioux, Daniel Asselineau

PHOTOMEDICINE

321 p53-Dependent UVB responsiveness of human keratinocytes can be altered by cultivation on cell cycle-arrested dermal fibroblasts

Katrin Will, Maresa Neben, Thomas Schmidt-Rose, Wolfgang Deppert, Klaus-Peter Wittern, Jörg Bergemann

327 Characterization of the autofluorescence of polymorphonuclear leukocytes, mononuclear leukocytes and cervical epithelial cancer cells for improved spectroscopic discrimination of inflammation from dysplasia

Douglas L. Heintzelman, Reuben Lotan, Rebecca R. Richards-Kortum

333 Time-dependent biodistribution of tetra(*m*-hyroxyphenyl)chlorin and benzoporphyrin derivative monoacid ring A in the hamster model: Comparative fluorescence microscopy study

S. Andrejevic Blant, J.-P. Ballini, H. van den Bergh, Ch. Fontolliet, G. Wagnières, Ph. Monnier

341 Plasma membrane properties involved in the photodynamic efficacy of merocyanine 540 and tetrasulfonated aluminum phthalocyanine

Johan W.M. Lagerberg, Karl P. Überriegler, Barbara Krammer, John VanSteveninck, Tom M.A.R. Dubbelman

347 Stabilization of the optical tracer agent indocyanine green using non-covalent interactions

Raghavan Rajagopalan, Pamela Uetrecht, Joseph E. Bugaj, Samuel A. Achilefu, Richard B. Dorshow

RAPID COMMUNICATIONS

351 Monitoring of impending myocardial damage after pleuropneumonectomy and intraoperative photodynamic therapy for malignant pleural mesothelioma using biochemical markers

J.M. Klaase, J.C.J.M. Swaanenburg, H. Schouwink, M.N. Sosef, J.M.G. Bonfrer, F.A.N. Zoetmulder, E.J.Th. Rutgers, P. Baas

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 71 • No. 4 • April 2000

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

355 Participation of the photosensitizer alpha-terthienyl in the peroxidase-catalyzed oxidation of indole-3-acetic acid

Thomas M. Brennan, Esther Lee, Paul R. Battaglia

361 Structural and environmental requirements for quenching of singlet oxygen by cyanine dyes

Jeffrey R. Kanofsky, Paul D. Sima

369 Simultaneous photoconjugation of methylene blue and *cis*-$Rh(phen)_2Cl_2^+$ to DNA *via* a synergistic effect

Taj Mohammad, Harry Morrison

382 Resolved fluorescence of the two tryptophan residues in horse apomyoglobin

Jean-Marie Glandières, Charles Twist, Ahmed Haouz, Christian Zentz, Bernard Alpert

387 Excited state properties of α,ω-diphenylpolyenes: Photophysical and photochemical studies of donor–acceptor diarylbutadienes

Anil K. Singh, Ganapati R. Mahalaxmi

397 The effect of pH on the photophysics and photochemistry of di-sulphonated aluminum phthalocyanine

R. B. Ostler, A. D. Scully, A. G. Taylor, I. R. Gould, T. A. Smith, A. Waite, D. Phillips

405 The influence of water on the photophysical and photochemical properties of *Piroxicam* in AOT/*iso*-octane/water reversed micelles

Suzana M. Andrade, Sílvia M.B. Costa, Robert Pansu

413 Cyanine dyes as protectors of K562 cells from photosensitized cell damage

Paul D. Sima, Jeffrey R. Kanofsky

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

422 The use of silver-stained "comets" to visualize DNA damage and repair in normal and *Xeroderma pigmentosum* fibroblasts after exposure to simulated solar radiation

Pascale Reinhardt-Poulin, J. R. McLean, Y. Deslauriers, W. Gorman, S. Cabat, M. Rouabhia

426 A sunscreen–tanning compromise: 3D visualization of the actions of titanium dioxide particles and dihydroxyacetone on human epiderm

Germain Puccetti, Roger M. Leblanc

431 Development and intercalibration of ultraviolet solar actinometers

Joseph J. Jankowski, David J. Kieber, Kenneth Mopper, Patrick J. Neale

PHOTOSYNTHESIS AND PHOTOCONVERSION

441 Oxygen uptake photosensitized by disorganized chlorophyll in model systems and thylakoids of greening barley

Varda Caspi, Shmuel Malkin, Jonathan B. Marder

PHOTOMEDICINE

447 *In vitro* fluorescence, toxicity and phototoxicity induced by δ-aminolevulinic acid (ALA) or ALA-esters

Sabine Eléouet, Nathalie Rousset, Jérôme Carré, Ludovic Bourré, Véronique Vonarx, Youenn Lajat, Gerard M. J. Beijersbergen van Henegouwen, Thierry Patrice

455 Role of the p38 and MEK-½/p42/44 MAP kinase pathways in the differential activation of human immunodeficiency virus gene expression by ultraviolet and ionizing radiation

Mohiuddin M. Taher, Chad M. Hershey, Jacqueline D. Oakley, Kristoffer Valerie

460 Plasma membrane associated location of sulfonated *meso*-tetraphenyl-porphyrins of different hydrophilicity probed by total internal reflection fluorescence spectroscopy

R. Sailer, W. S. L. Strauss, H. Emmert, K. Stock, R. Steiner, H. Schneckenburger

466 Relationship between vitamin D status and skin phototype in general adult population

Denis J.-M. Malvy, Christiane Guinot, Paul Preziosi, Pilar Galan, Marie-Claire Chapuy, Mohamed Maamer, Solange Arnaud, Pierre J. Meunier, Serge Hercberg, Erwin Tschachler

PHOTOSENSORY BIOLOGY

470 Heat and concentration effects on the small heat shock protein, α-crystallin

Krishnagopal Mandal, James Dillon, Elizabeth R. Gaillard

476 Photocurrent from oriented membrane films containing acid-blue and acid-purple bacteriorhodopsin and its mutants

Jianping Wang

481 Two photobiological pathways of phytochrome A activity, only one of which shows dominant negative suppression by phytochrome B

Jorge J. Casal, Marcelo J. Yanovsky, Juan P. Luppi

487 Changes in hemolymph glutathione status after variation in photoperiod and light irradiance in crayfish *Procambarus clarkii* and *Procambarus digueti*

Julio Prieto-Sagredo, Inés Ricalde-Recchia, María Elena Durán-Lizarraga, María Eugenia Gonsebatt, María Luisa Fanjul-Moles

493 A novel prokaryotic UVB photoreceptor in the cyanobacterium *Chlorogloeopsis* PCC 6912

Anne Portwich, Ferran Garcia-Pichel

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 71 • No. 5 • May 2000

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

499 Tiaprofenic acid-photosensitized damage to nucleic acids: A mechanistic study using complementary *in vitro* approaches

C. Agapakis-Caussé, F. Boscá, J. V. Castell, D. Hernández, M. L. Marín, L. Marrot, M. A. Miranda

506 Photophysical properties of the lowest excited singlet and triplet states of thio- and seleno-psoralens

G. G. Aloisi, F. Elisei, S. Moro, G. Miolo, F. Dall'Acqua

514 Systematic study of parameters influencing the action of Rose Bengal with visible light on bacterial cells: Comparison between the biological effect and singlet-oxygen production

M. Schäfer, C. Schmitz, R. Facius, G. Horneck, B. Milow, K.-H. Funken, J. Ortner

524 Absolute rate constants for the quenching of reactive excited states by melanin and related 5,6-dihydroxyindole metabolites: Implications for their antioxidant activity

Xiangyang Zhang, Carl Erb, Josef Flammer, Werner M. Nau

534 Part I. Photochemical and photophysical studies of guanine derivatives: Intermediates contributing to its photodestruction mechanism in aqueous solution and the participation of the electron adduct

Carlos E. Crespo-Hernández, Sara Flores, Carlos Torres, Ideliz Negrón-Encarnación, Rafael Arce

544 Part II. Mechanism of formation of guanine as one of the major products in the 254 nm photolysis of guanine derivatives: Concentration and pH effects

Carlos E. Crespo-Hernández, Rafael Arce

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

551 Modulation of *c-jun* and *c-fos* transcription by UVB and UVA radiations in human dermal fibroblasts and KB cells

Marco Soriani, Vidya Hejmadi, Rex M. Tyrrell

559 Continuing damage to rat retinal DNA during darkness following light exposure

Sandra Specht, Daniel T. Organisciak, Ruth M. Darrow, Michael Leffak

PHOTOSYNTHESIS AND PHOTOCONVERSION

567 The effects of epimerization at the 3^1-position of bacteriochlorophylls *c* on their aggregation in chlorosomes of green sulfur bacteria. Control of the ratio of 3^1 epimers by light intensity

Takasada Ishii, Mikiko Kimura, Takahiro Yamamoto, Mitsunori Kirihata, Kaku Uehara

574 Assignment of the lowest Q_y-state and spectral dynamics of the CP29 chlorophyll *a/b* antenna complex of green plants: A hole-burning study

Jörg Pieper, Klaus-Dieter Irrgang, Margus Rätsep, Joachim Voigt, Gernot Renger, Gerald J. Small

582 Heterodimeric *versus* homodimeric structure of the primary electron donor in *Rhodobacter sphaeroides* reaction centers genetically modified at position M202

Eliane Nabedryk, Claudia Schulz, Frank Müh, Wolfgang Lubitz, Jacques Breton

589 Resonance Raman and surface-enhanced resonance Raman spectra of LH2 antenna complex from *Rhodobacter sphaeroides* and *Ectothiorhodospira* sp. excited in the Q_x and Q_y transitions

George Chumanov, Rafael Picorel, Iñaki Ortiz de Zarate, Therese M. Cotton, Michael Seibert

596 Structural transformation among the aggregate forms of bacteriochlorophyll *c* as determined by electronic-absorption and NMR spectroscopies: Dependence on the stereoisomeric configuration and on the bulkiness of the 8-C side chain

Tadashi Mizoguchi, Kazukimi Hara, Hiroyoshi Nagae, Yasushi Koyama

PHOTOMEDICINE

610 Light scattering and absorption model for the quantitative interpretation of human blood platelet spectral data

Yvette Mattley, German Leparc, Robert Potter, Luis García-Rubio

620 Induction of multinucleated cells caused by UVA exposure in different stages of the cell cycle

Marit Bråthen, Hilde Bånrud, Kristian Berg, Johan Moan

627 Effects of photoinduced membrane rigidification on the lysosomal permeability to potassium ions

Yi-gang Zhong, Guo-jiang Zhang, Lu Yang, Yan-Zhen Zheng

634 Quantitative analysis of Pc 4 localization in mouse lymphoma (LY-R) cells *via* double-label confocal fluorescence microscopy

Niraj S. Trivedi, Hsing-Wen Wang, Anna-Liisa Nieminen, Nancy L. Oleinick, Joseph A. Izatt

640 5-Aminolevulinic acid, but not 5-aminolevulinic acid esters, is transported into adenocarcinoma cells by system BETA transporters

Eva Rud, Odrun Gederaas, Anders Høgset, Kristian Berg

PHOTOSENSORY BIOLOGY

648 Luciferase and urate may act as antioxidant defenses in larval *Pyrearinus termitilluminans* (Elateridae: Coleoptera) during natural development and upon 20-hydroxyecdysone treatment

Marcelo P. Barros, Etelvino J. H. Bechara

655 The photoreactions of recombinant phytochrome from the cyanobacterium *Synechocystis:* A low-temperature UV–Vis and FT-IR spectroscopic study

Harald Foerstendorf, Tilman Lamparter, Jon Hughes, Wolfgang Gärtner, Friedrich Siebert

662 Characterization of blue-light and developmental regulation of the photolyase gene *phr1* in *Trichoderma harzianum*

Gloria M. Berrocal-Tito, Teresa Rosales-Saavedra, Alfredo Herrera-Estrella, Benjamin A. Horwitz

669 Immunological and biochemical evidence that blepharismin is not a prosthetic group

Adriano Podestà, Domenico Gioffré, Tommaso Grossi, Giorgio Montagnoli

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 71 • No. 6 • June 1999

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

675 Photosensitized reduction of methyl viologen using eosin-Y in presence of a sacrificial electron donor in water–alcohol mixture

Shafiqul D.-M. Islam, Toshifumi Konishi, Mamoru Fujitsuka, Osamu Ito, Yuka Nakamura, Yoshiharu Usui

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

681 Solar UV dose patterns in Italy

Daniela Meloni, Giuseppe R. Casale, Anna Maria Siani, Sabino Palmieri, Francesco Cappellani

691 Hydrogen peroxide formation and decay in iron-rich geothermal waters: The relative roles of abiotic and biotic mechanisms

Cindy L. Wilson, Nancy W. Hinman, Richard P. Sheridan

700 The effect of suntan parlor exposure on delayed and contact hypersensitivity

S. Elizabeth Whitmore, Warwick L. Morison

PHOTOSYNTHESIS AND PHOTOCONVERSION

706 Expression of *psbA* genes is regulated at multiple levels in the cyanobacterium *Synechococcus* sp. PCC 7942

Katja Sippola, Eva-Mari Aro

715 Effect of carotenoid biosynthesis inhibition on the chlorosome organization in *Chlorobium phaeobacteroides* strain CL1401

Juan B. Arellano, Jakub Psencik, Carles M. Borrego, Ying-Zhong Ma, Rémy Guyoneaud, Jesús Garcia-Gil, Tomas Gillbro

PHOTOMEDICINE

724 Photodynamic therapy of superficial basal cell carcinoma with 5-aminolevulinic acid with dimethylsulfoxide and ethylendiaminetetraacetic acid: A comparison of two light sources

Ana Maria Soler, Even Angell-Petersen, Trond Warloe, Johan Tausjø, Harald B. Steen, Johan Moan, Karl-Erik Giercksky

730 Autofluorescence patterns in short-term cultures of normal cervical tissue

Carrie K. Brookner, Michele Follen, Iouri Boiko, Javier Galvan, Sharon Thomsen, Anais Malpica, Seigo Suzuki, Reuben Lotan, Rebecca Richards-Kortum

737 Multispectral imaging autofluorescence microscopy for the analysis of lymph-node tissues

Luigi Rigacci, Renato Alterini, Pietro Antonio Bernabei, Pierluigi Rossi Ferrini, Giovanni Agati, Franco Fusi, Monica Monici

743 The *Monodelphis* melanoma model: Initial report on large ultraviolet A exposures of suckling young

E. S. Robinson, R. H. Hill, Jr., M. L. Kripke, R. B. Setlow

747 Comparison of photodynamic targets in a carcinoma cell line and its mitochondrial DNA-deficient derivative

J. Morgan, W. R. Potter, A. R. Oseroff

PHOTOSENSORY BIOLOGY

758 Daily and circadian variation in survival from ultraviolet radiation in *Chlamydomonas reinhardtii*

Selene S. Nikaido, Carl Hirschie Johnson

766 The effect of polarized *versus* nonpolarized light on melatonin regulation in humans

George C. Brainard, Mark D. Rollag, John P. Hanifin, Gerrit van den Beld, Britt Sanford

771 The enhanced green fluorescent protein as a tool for the analysis of protein dynamics and localization: Local fluorescence study at the single-molecule level

Riccardo A. G. Cinelli, Aldo Ferrari, Vittorio Pellegrini, Mudit Tyagi, Mauro Giacca, Fabio Beltram

i Contents, Vol. 71

xi Author Index, Vol. 71

xiv Subject Index, Vol. 71
